SUMMARY

- Enthusiastic and results-driven software engineer with a Bachelor's degree in Electronic and Communications. Proficient in Java, Python, SQL, and MySQL, with expertise in tools such as Spring Boot and Apache Kafka. My career objective is to secure software engineering roles that present challenging situations, fostering a dynamic learning environment to propel my career forward.

SKILLS SUMMARY

- **Languages:** Python, JavaScript, SQL, Java, TypeScript
- **Frameworks:** Spring, Spring Boot, NodeJS, ORM, Mithra, NodeJs, ReactJs
- **Tools:** Kubernetes, Docker, GIT, Mongo, PostgreSQL, MySQL, Kafka, Copilot, Vibe Coding
- **Others:** Back-end Engineering, System Design, Problem Solving, UI, Prototype Development, Building Skills, Building AI Agents for Quick tasks

EXPERIENCE

- **Sigmoid (Client: Goldman Sachs)** On-site
Software Development Engineer - II April 2024 - Present
 - **Backend and Frontend Development:** Develop and maintain scalable back-end services and enhance front-end features for a seamless user experience.
 - **Debugging and Feature Enhancements:** Identify and resolve application issues; implement new features to improve product functionality.
 - **Requirement Analysis and Product Grooming:** Collaborate with product teams to understand requirements and contribute to effective grooming sessions for application improvements.
 - **Application Deployment and Monitoring:** Manage deployments and monitor system performance to ensure reliability and optimize resource utilization.
- **Tata Consultancy Services** Ahmedabad
Software Engineer August 2021 - April 2024
 - **Performance Enhancements:** Designed and implemented development and feature enhancements, resulting in a 15% increase in overall software performance.
 - **Incident Resolution:** Resolved over 30 technical incidents monthly, improving system reliability and user satisfaction.
 - **Reusable Component Library:** Developed a comprehensive library of reusable software components, reducing development time by 25% and boosting team productivity.
 - **User Onboarding Strategies:** Engineered and executed data-driven user onboarding across multiple business scenarios, achieving 100% customer satisfaction.
- **Tata Consultancy Services** Remote
Jr Data Engineer - Intern March 2021 - July 2021
 - **System Integration:** Integrated complaint and grievance management system for citizen services.
 - **Operational Efficiency:** Enhanced business processes & reporting, boosting operational efficiency by 20%.
 - **Data Management:** Performed data cleaning and extraction to consolidate information from multiple sources for detailed reporting.
- **Centre for Materials for Electronics Technology** Hyderabad
R&D Intern June 2020 - July 2022
 - **Antenna Research and Development:** Conducted research on various materials to enhance antenna signal strength and coverage while optimizing production costs.

PROJECTS

- **Cloud Cost Intelligence(Engg Hack-a-thon):** Engineered a cloud cost analysis platform to identify inefficiencies and reduce infrastructure spend using automated insights. Enabled developers to make cost-aware decisions through intelligent analysis of cloud resources and usage patterns.
- **AI-Powered CPG Sales Analytics & Forecasting Platform (Machine Learning, Data Engineering, Full Stack, Vibe Coding):** Built an end-to-end plug-and-play sales intelligence platform for CPG enterprises, enabling users to upload raw transaction, product, and store data to auto-train a revenue forecasting model. Delivered an executive dashboard surfacing estimated profit, gross margins, discount erosion, brand performance, and probabilistic revenue forecasts with confidence intervals — powering faster, data-driven decisions for Sales and C-suite leadership. (Sigmoid Analytics)
- **Machine Learning-Based Medication Forecasting (Machine Learning):** Applied machine learning techniques to predict medication needs, improving precision and efficiency in pharmaceutical applications. (2019 B.Tech)
- **YouTube Content Recommendation & Spotify Automation (Automation, Recommendation Systems):** Developed recommendation systems for YouTube and automated Spotify features using advanced automation tools. (2020 B.Tech)

EDUCATION

- **JNTU Hyderabad - Ace Engineering College** Hyderabad, India
Bachelor of Technology - Electronics & Communications; GPA: 7.78 *Aug 2017 - May 2021*

HONORS AND AWARDS

- Spot Award - Sigmoid
- On the Spot Award - TCS
- Awarded Star of the Month (2x) - TCS
- Distinction in Schooling & Graduation
